
iPad Loan Introduction

The iPad you have been loaned by Fortis Academy comes with all the applications that should be needed to assist your home learning.

The internet is accessed through the app F D Monitor. This has replaced Safari on this device so that we can ensure you use the internet safely through this device. The searches and sites you visit are monitored by the Local Authority and we will be advised by them if there is any attempt to access unsuitable content. As well as this the internet restrictions you would have in school have been applied to this iPad.

To access your school account for the first time go to F D Monitor which will take you to the site www.myfa.org.uk . Select Teams or Email and log in using your school email address and password.

Your school email address is your school login followed by @fortis.shaw-education.org.uk

Should F D Monitor fail to load try closing the app (press the home button then drag the app up to the top of the screen). Should that not work you can try restarting the Wi-fi by dragging your finger up from the bottom of the screen and tapping on the Wi-fi icon to stop it, then tap it again to restart it.

Should you require any further assistance please email fortisitsupport@fortis.shaw-education.org.uk giving details of your problem.
